

Awstats

For cPanel & WHM version 66

(Home >> Metrics >> Awstats)

Overview

The Awstats interface displays traffic statistics from the [Advanced Web Statistics \(AWStats\)](#) software, which compiles information about how users access your website.

View AWStats data

To view AWStats traffic statistics for a domain, click [View](#) for the domain that you wish to view. A new interface will appear that displays the AWStats traffic statistics for that domain.

AWStats displays the following details about your website's visitors:

- Monthly, daily, and hourly averages in graphs and tables.
- The links through which visitors access your website.
- HTTP codes.
- Operating systems.
- Browser information.
- Locales of origin.
