# Feature Manager

#### For cPanel & WHM version 64

(Home >> Packages >> Feature Manager)

Overview
Predefined feature lists
Create and edit a feature list
Delete a feature list
Selectable features
Additional documentation

## Overview

This interface allows you to edit feature lists, which you can assign to packages that you apply to cPanel accounts. Feature lists provide or prevent access to specific cPanel features.

## **Predefined feature lists**

cPanel & WHM includes the default, disabled, and Mail Only feature lists by default.

- If you are a reseller who only owns a mail server, use the Mail Only feature list.
- If you disable a feature in the *default* feature list, the system disables the feature by default for all of the users on your server. To override this configuration, create a new list and assign it to your users.

If you disable a feature in the *disabled* feature list, the system disables the feature for all of the users on your server. You **cannot** override this feature list with a new list.

#### Notes:

- To **enable** a feature in the *default* feature list, select the feature's checkbox.
- To **disable** a feature in the *disabled* feature list, select the feature's checkbox.

### Create and edit a feature list

To create a new feature list or edit an existing feature list, perform the following steps:

- 1. Choose one of the following options:
  - To create a new feature list, enter the desired feature list name in the Add a new feature list text box and click Add Feature List.

#### Note:

Choose an easy-to-remember name so that you can properly assign it.

- . To edit an existing feature list, select the desired feature list from the Manage feature list menu and click Edit.
- 2. Select checkboxes to enable features, or deselect checkboxes to disable features.

#### Note:

To **disable** a feature in the *disabled* feature list, select the feature's checkbox.

3. Click Save.

### Delete a feature list

To remove an existing feature list, perform the following steps:

- 1. From the Manage a feature list menu, select the feature list to remove.
- 2. Click Delete.

## Selectable features

# Warnings:

- This table lists the cPanel interfaces for the default cPanel theme (Paper Lantern). If you use the another theme for the cPanel interface, these interfaces and locations may vary slightly.
- Some cPanel features may require that you enable additional settings in order for them to function. Read each feature's
  documentation for additional information.
- Various settings and customizations can add or remove features from this interface. You may see additional features that
  display a Legacy label if they correspond to a deprecated theme, or a Plugin label, if they correspond to a specific plugin. The
  following list is not canonical for every server.

On most cPanel & WHM servers, you can select the following features:

Addon Domains Feature Manager interface (Home >> Domains >> Addon Domains) Address Importer Feature Manager interface (Home >> Domains >> Address Importer) Advanced Zone Editor Advanced Zone Editor Advanced Zone Editor interface (Home >> Domains >> Advanced Zone Editor Adjaces Agora Shopping Cart Enables Agora Shopping Cart. 	Change Style	Feature Manager interface (Home >> Preferences >> Change Style)			

Configure Greylisting	Feature Manager interface ( Home >> Email >> Configure Greylisting )
Contact Information	Feature Manager interface (Home >> Preferences >> Contact Information)
cPanel Spotlight	The cPanel interface's feature spotlight. For more information, read our Feature Manager documentation.
cPanel Market	Enables cPanel Market functionality.
CPU and Concurrent Connection Usage	Server Load statistic in cPanel's Server Information interface.  Note: This feature only exists on servers that run CloudLinux™.
Cron Jobs	Feature Manager interface (Home >> Advanced >> Cron Jobs)
Default Address	Feature Manager interface (Home >> Email >> Default Address)
Directory Selection Popup	Directory Selection window when the user opens the Feature Manager interface (Home >> Files >> File Manager).
Disk Usage Viewer	Feature Manager interface (Home >> Files >> Disk Usage)
Email Accounts	Feature Manager interface (Home >> Email >> Email Accounts)
Email Archiving	Feature Manager interface (Home >> Email >> Archive)
Email Authentication	Feature Manager interface (Home >> Email >> Authentication)
Email Delivery Route	This feature is <b>deprecated</b> .
Email Disk Usage	Feature Manager interface (cPanel >> Home >> Email >> Email Disk Usage)
Email Domain Forwarding	Forward All Email for a Domain setting in the Feature Manager interf ace (Home >> Email >> Forwarders)
Email Filtering Manager	Feature Manager interface (Home >> Email >> Email Filters)
Email Trace	Feature Manager interface (Home >> Email >> Track Delivery)
Error Log	Feature Manager interface (Home >> Metrics >> Errors)
Error Pages	Feature Manager interface ( Home >> Advanced >> Error Pages )
File Manager	Feature Manager interface (Home >> Files >> File Manager)
Forwarder Manager	Feature Manager interface (Home >> Email >> Forwarders)
FTP Account Manager	Feature Manager interface (Home >> Files >> FTP Accounts)
FTP Settings	Allows the user to manage FTP settings.
Hotlink Protection	Feature Manager interface (Home >> Security >> Hotlink Protection)
Images	Feature Manager interface (Home >> Files >> Images)
Index Manager	Feature Manager interface (Home >> Advanced >> Indexes)
IP Blocker	Feature Manager interface (Home >> Security >> IP Blocker)
Latest Visitors	Feature Manager interface (Home >> Metrics >> Visitors)
Leech Protect (requires Webprotect)	Feature Manager interface (Home >> Security >> Leech Protection)
Manage DNSSEC	DNSSEC settings in the Feature Manager interface (Home >> Domains >> Zone Editor)
Mailing Lists	Feature Manager interface (Home >> Email >> Mailing Lists)

Metrics Editor	Feature Manager interface ( Home >> Metrics >> Metrics Editor )
MIME Types	Feature Manager interface (Home >> Advanced >> MIME Types)
ModSecurity™ Domain Manager	Feature Manager interface (Home >> Security >> ModSecurity)
MultiPHP INI Editor	MultiPHP INI Editor interface (Home >> Software >> MultiPHP INI Manager)
	<b>Note:</b> This interface is only available on servers that run EasyApache 4.
MultiPHP Manager	MultiPHP Manager interface (Home >> Software >> MultiPHP Manager)
	Note: This interface is only available on servers that run EasyApache 4.
MX Entry	Feature Manager interface (Home >> Email >> Email Routing)
MySQL	Enables MySQL®.
Optimize Website	Feature Manager interface (Home >> Software >> Optimize Website )
Password & Security	Password & Security interface (Home >> Preferences >> Password & Security)
Perl Modules	Feature Manager interface (Home >> Software >> Perl Modules)
PGP/GPG	Enables PGP and GPG encryption.
PHP PEAR Packages	Feature Manager interface (Home >> Software >> PHP PEAR Packages)
PhpMyAdmin	Enables phpMyAdmin.
PhpPgAdmin	Enables phpPgAdmin.
PostgreSQL	Enables PostgreSQL®.
Raw Access Logs	Feature Manager interface (Home >> Metrics >> Raw Access)
Redirects	Feature Manager interface (Home >> Domains >> Redirects)
RubyGems	Feature Manager interface (Home >> Software >> RubyGems)
Ruby on Rails	Enables Ruby on Rails®.
See PHP Configuration	Feature Manager interface (Home >> Software >> PHP)
Server Status Viewer	Service Information information in cPanel's Server Information interface.
Simple Zone Editor	Feature Manager interface (Home >> Domains >> Simple Zone Editor)
Site Publisher	Feature Manager interface (Home >> Domains >> Site Publisher)
Site Software	Feature Manager interface (Home >> Software >> Site Software)
SSH Access	Feature Manager interface (Home >> Security >> SSH Access)
SSL Host Installer	Enables SSL certificate installation.

SSL/TLS Wizard	SSL/TLS Wizard interface (Home >> Security >> SSL/TLS Wizard)			
Subdomains	Feature Manager interface (Home >> Domains >> Subdomains)			
Subdomain Stats	Enables statistics for subdomains.			
Theme Switching	Theme menu in the General Information section of cPanel's Home in terface.			
Track DNS	Feature Manager interface ( Home >> Advanced >> Track DNS)			
Two-Factor Authentication (Google Authenticator)	Two-Factor Authentication interface (Home >> Security >> Two-Factor Authentication)			
Update Notification Preferences	Enables notification preference options in the <i>Feature Manager</i> interf ace ( <i>Home</i> >> <i>Preferences</i> >> <i>Contact Information</i> ).			
Virus Scanner	Enables ClamAV virus scans.			
Web Disk	Feature Manager interface (Home >> Files >> Web Disk)			
Webalizer	Feature Manager interface (Home >> Metrics >> Webalizer)			
Webmail	Webmail feature in the Feature Manager interface (Home >> Email >> Email Accounts)			
Webprotect	WebProtect application.			
WordPress (cPanel)	cPanel-provided WordPress® installer
