## Description

This function installs an SSH key from the [cPanel Customer Portal](#).

## Examples

### JSON API

```
https://hostname.example.com:2087/cpsess#####/json-api/ticket_grant?api.version=1&ticket_id=999999999&server_num=1&secureid=rofh411bv8&ssh_username=root
```

### XML API

```
https://hostname.example.com:2087/cpsess#####/xml-api/ticket_grant?api.version=1&ticket_id=999999999&secureid=rofh411bv8&server_num=1&ssh_username=root
```

## Function information

## About WHM API 1

WHM API 1 performs functions and accesses data in WHM.

Addon Domains

Command Line

```
whmapil ticket_grant  
ticket_id=999999999  
secureid=rofh411bv8  
server_num=1  
ssh_username=root
```

**Notes:**

- You **must** URI-encode values.
- For more information and additional output options, read our [Guide to WHM API 1](#) documentation or run the `whmapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `whmapil` command:

```
/usr/local  
/cpanel/bin/whmapil
```

Find a function

cPanel Customer Portal to the server.

- WHM API 1 Functions - ticket\_revoke - This function removes a cPanel Customer Portal SSH key from the server.

**Note:**

Use WHM's *API Shell* interface (*WHM >> Home >> Development >> API Shell*) to directly test WHM API calls.

**Parameters**

Parameter	Type	Description	Possible values	Example
ticket_id	integer	<b>Required</b> The support ticket's ID number.	A valid positive integer.	999999999
secure_id	string	<b>Required</b> The support ticket's secure ID token.  <b>Note</b> : We added this parameter in cPanel & WHM version 76.	A valid string.	rofh411bv8
server_num	integer	<b>Required</b> The server's support ticket ID number.	A valid positive integer.	1
ssh_username	string	The username for incoming SSH connections before they escalate to the root user.  If you do not specify a value, the function will retrieve the user from the support ticket.	A valid system username.	root

**Returns**

Return	Type	Description	Possible values	Example
--------	------	-------------	-----------------	---------

get\_cphulk\_brutes  
 get\_cphulk\_excessive\_brutes
