Description

This function saves a string to a BoxTrapper configuration file or form letter.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Important:

In cPanel & WHM version 76 and later, when you disable the MailReceiver role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.
