Description

This function uploads an SSL certificate to the server.

Warning:

cPanel API 1 is **deprecated**. Do not use this function. Instead, we **strongly** recommend that you use the following newer functions:

- **UAPI (recommended)** — `SSL::upload_cert` — This function uploads a certificate.
- **cPanel API 2** — `SSL::uploadcert` — This function uploads an SSL certificate.

Examples

▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$upload_certificate =  
$cpanel->api1('SSL', '  
uploadcert',  
array('~'/TestCRT') );  
// Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Func tion infor mati on

About this mod ule

The SSL module manages certificate s, certificate requests, and keys on your server.

About t cPan el API 1

cPanel API 1 accesses informati on about cPanel accounts.

LiveAPI Perl Module

```
my $cpliveapi =  
Cpanel::LiveAPI->new(  
); # Connect to  
cPanel - only do this  
once.  
my  
$upload_certificate =  
$cpliveapi->apil('SSL'  
, 'uploadcert',  
['~/TestCRT'] ); #  
Call the function.
```

Note:
For more information, read our [Guide to the LiveAPI System](#).

cPanel Tag System (deprecated)

Warning:
In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel  
Module="SSL::uploadcert(  
$FORM('file') )">
```

Warning:
cPanel API deprecated. We strongly recommend cPanel API or UAPI instead.
