Description

This function saves a string's contents to an HTML file.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Important:

In cPanel & WHM version 76 and later, when you disable the FileStorage role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

Examples

LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$save_file =  
$cpanel->apil('Fileman',  
'savehtmlfile',  
array('public_html',  
'myfile.html',  
'<p>This is the new  
string</p>', '1',  
'1')); // Call the  
function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).
