Description

This function corrects common BoxTrapper configuration file issues. When you run this function, the system removes duplicates and standardizes regular expressions in the BoxTrapper configuration file. Then, the system rewrites a clean configuration file.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Important:

In cPanel & WHM version 76 and later, when you disable the MailReceive role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

Examples

▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$clean_boxtrapper_file =  
$cpanel->api('BoxTrapper',  
'cleancfgfilelist',  
array('user@example.com', 'list',  
'black-list.txt') );  
// Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

About this module

The BoxTrapper module manages the BoxTrapper subsystem.

Note:
This module *BoxTrapper* feature.

LiveAPI Perl Module

```
my $cpliveapi =  
Cpanel::LiveAPI->new(  
); # Connect to  
cPanel - only do this  
once.  
my  
$clean_boxtrapper_file =  
$cpliveapi->api('Box  
Trapper',  
'cleancfgfilelist',  
['user@example.com',  
'list',  
'black-list.txt'] );  
# Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

cPanel Tag System (deprecated)

Warning:

In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel  
Module="BoxTrapper::c  
leancfgfilelist(  
$FORM('account','file  
type','cfgfile') )">
```

cPanel API 1 accesses information about cPanel accounts.

Warning: cPanel API **deprecated**. We **strongly** recommend [cPanel API](#) or [UAPI](#) instead.

Notes:

- The *Fe*
- Ur **mi** us 20 or 20). ` 20 or 20).

▼ Command Line

```
cpapi1
--user=username
BoxTrapper
changestatus
user@example.com list
black-list.txt
```

Notes:

- You **must** URI-encode these values.
- username represents your account-level username.
- For more information and additional output options, read our [Guide to cPanel API 1 documentation](#) or run the `cpapi1 --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapi1` command:

```
/usr/local
/cpanel/bin/cpapi1
```

▼ Output (none)

This function does not return output.

Parameters

Parameter	Type	Description	Possible values	Example
account	string	Required The account's email address.	A valid email address on the server.	user@example.com

- cPanel API 1 Functions - Email::addspambfilter — This function modifies the minimum Apache SpamAssassin™ spam score.
- cPanel API 1 Functions - Email::delspam — This function disables Apache SpamAssassin™ for a cPanel account.
