Description

This function enables or disables BoxTrapper for an email account.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Important:

In cPanel & WHM version 76 and later, when you disable the MailReceiver role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

cPanel Tag System (deprecated)

Warning:
In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel  
Module="BoxTrapper::c  
hangestatus(  
$FORM('account', 'acti  
on') )">
```

cPanel API 1 accesses information about cPanel accounts.

Warning:
cPanel API **deprecated**. We **strongly** recommend [cPanel API](#) or [UAPI](#) instead.
