

Upgrade/Downgrade an Account

This document is for a previous release of cPanel & WHM. To view our latest documentation, visit our [Home page](#).

For cPanel & WHM 11.44

([Home](#) >> [Account Functions](#) >> [Upgrade/Downgrade an Account](#))

[Overview](#)

[Change package](#)

Overview

This interface allows you to change an account's package. You may wish to do this, for example, when a site's popularity changes and the account's owner wishes to change the hosting plan to suit the new flow of traffic.

Note:

Changes that you make in this interface do **not** change the account's IP address. To modify the IP address for an account, use the [Change Site's IP Address](#) interface ([Home](#) >> [Account Functions](#) >> [Change Site's IP Address](#)).

Change package

To change an account's package, perform the following steps:

1. Select the desired account and click *Modify*.
2. Select the new package from the list.

Note:

Click the

icon to view the configuration of any package in the list.

3. Click *Upgrade/Downgrade*.
