## Description

This function generates a list of messages in the BoxTrapper queue.

### Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

### Important:

In cPanel & WHM version 76 and later, when you disable the MailReceiver role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

## Examples

### ▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.

pper', 'showqueue',  
array('1410277881',  
'user@example.com',  
'showmsg.html', '',  
'0') ); // Call the  
function.
```

### Note:

For more information, read our [Guide to the LiveAPI System](#).
