[Overview](#)

[How to process user statistics](#)

Overview

Use the *Process Statistics for User* area to process the statistics for individual cPanel accounts. The process will run in the background and store the results while you continue to work in WHM.

How to process user statistics

To process the statistics:

1. Select the cPanel user account from the *User to Process* menu.
2. Click *Go*.

You can use Webalizer, AWStats, Analog, or Logaholic to view these statistics in the user's cPanel interface.
