cPAddons Site Software admin email

This setting allows you to specify a contact email address that will receive cPAddons moderation requests. The system will also notify resellers if they choose to configure their contact email address in their cPanel interfaces.

To configure the administrator email, enter the email address that you wish to use.

This setting's value defaults to *None*.

Note:

A moderation request is a request from a user who wants to install or upgrade an addon. You **must** approve the request before the user can install or upgrade an addon.

cPAddons Site Software source automatic updates

This setting allows you to specify if you wish for cPanel & WHM to automatically update all cPAddons source files.

This setting's value defaults to *On*.

Max cPAddons Site Software installation requests

This setting allows you to specify the maximum number of moderation requests that a single user can make at one time.

To specify a new value, enter the number of requests that you wish to allow.

This setting's value defaults to 99.

Max cPAddons Site Software installation requests per addon

This setting allows you to specify the maximum number of moderation requests that a single user can make at one time, for each cPAddon.

To specify a new value, enter the number of requests that you wish to allow per cPAddon.

This setting's value defaults to 99.

cPAddons Site Software moderation notification

This setting allows you to select whether the cPAddons administrator will receive notifications about pending moderation requests.

This setting's value defaults to *Off*.

Allow cPAddons Site Software installations from non-cPanel sources

This setting allows you to select whether to allow the installation of third-party scripts on your server.

This setting's value defaults to *On*.

Allow cPAddons Site Software installations from modified sources

This setting allows you to select whether users can install previously altered cPAddons.

This setting's value defaults to *Off*.

Note:
\$body

Notify reseller of cPAddons Site Software installations

This setting allows the server to notify resellers whenever their users need to update their cPAddons.

This setting's value defaults to *On*.

Notify root of cPAddons Site Software installations

This setting allows the server to notify the cPAddons Site Software administrator whenever their users need to update their cPAddons.

This setting's value defaults to *On*.

Notify users of cPAddons Site Software installations

This setting allows the server to notify cPanel users whenever they need to update their cPAddons.

Select any of the following options:

- *Allow users to choose (default)* — This option allows cPanel users to specify whether they wish to receive notifications about out-of-date cPAddons.
- *always* — This option allows cPanel & WHM to automatically notify users when their cPAddons are out-of-date.
- *never* — This option allows you to specify that users should never receive notifications when their cPAddons are out-of-date.
