PHP PECL

For cPanel & WHM version 58

(*Home* >> *Software* >> *Module Installers*)

Overview

This section of the *Module Installers* interface allows you to manage and install PECL (PHP Extension Community Library) libraries.

Select a PHP version

This feature allows you to specify the version of PHP on which you will install the modules.

To select a specific version of PHP, perform the following steps:

1. Select a PHP version from the menu.
2. Click *Apply*.

PHP Pecl Installer

This feature allows you to search for, download, and install a library from the PECL repository.

> **Note:**
> If you know the exact name of the library that you wish to install, enter its name in the *Install a PHP Pecl* text box and click *Install Now.*

> **Important:**
> After you install a PHP extension on EasyApache 4, you **must** add the following line to your `php.ini` file:
>
> ```
> extension=<extension_name>.so
> ```
>
> `<extension_name>` represents the name of the PECL extension (For example: `extension=yaml.so`).

To search for and install a PHP library, perform the following steps:

1. Use one of the following methods to find the desired library:
    * Enter a search term in the available text box and click *Go*.
    * Click *Show Available PHP Pecl(s)* to list PHP libraries that are available from PECL.
2. The interface displays the following information for all of the displayed libraries:
    * *Module Name* — The library's name.
    * *Version* — The library's version number.
    * *Description* — A description of the library.
    * *Actions* — The actions that you may perform for that library.
3. Click *Install* next to the library that you wish to download and install.
    * To view a library's documentation, click *Show Docs* for that library.
    * If you did not find the desired library, enter a new keyword in the *Search* text box and click *Go*.

Installed PHP Pecl(s)

The *Installed PHP Pecl(s)* table lists all of the libraries that exist on your server.

For each installed library, the table displays the following information:

Column	Description
Module Name	The library's name.
Version	The library's version number.
Actions	You can perform the following actions for each library: • *Update* — Update the library. • *Reinstall* — Reinstall the library from PECL. • *Uninstall* — Remove the library from your server. • *Show Docs* — Read the library's documentation on PECL.
