Description

This function returns the first 200 lines of an email in the BoxTrapper queue.

Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

Important:

In cPanel & WHM version 76 and later, when you disable the MailReceiver role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

Examples

▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$print_queued_message  
=  
$cpanel->apil('BoxTra  
pper', 'showmessage',  
array('user@example.c  
om', '',  
'example.msg') ); //  
Call the function.
```

Note:

For more information, read our [Guide to the LiveAPI System](#).

Function information

About this module

The BoxTrapper module manages the BoxTrapper subsystem.

Note:
This module
BoxTrapper
feature.

About cPanel API 1

▼ LiveAPI Perl Module

```
my $cpliveapi =
Cpanel::LiveAPI->new(
); # Connect to
cPanel - only do this
once.
my
$print_queued_message
=
$cpliveapi->apil('Box
Trapper',
'showmessage',
['user@example.com',
'', 'example.msg'] );
# Call the function.
```

Note:
For more information, read our [Guide to the LiveAPI System](#).

▼ cPanel Tag System (deprecated)

Warning:
In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel
Module="BoxTrapper::s
howmessage(
$FORM('account','logd
ate','queuefile') )">
```

cPanel API 1 accesses information about cPanel accounts.

Warning:
cPanel API **deprecated**. We **strongly** recommend [cPanel API](#) or [UAPI](#) instead.

▼ Command Line

```
cpapil
--user=username
BoxTrapper
showmessage
user@example.com ''
example.msg
```

Notes:

- You **must** URI-encode these values.
- username represents your account-level username.
- For more information and additional output options, read our [Guide to cPanel API 1 documentation](#) or run the `cpapil --help` command.
- If you run CloudLinux™, you **must** use the full path of the `cpapil` command:

```
/usr/local
/cpanel/bin/cpapil
```

- cPanel API 1 Functions - Email::addspamfilter — This function modifies the minimum Apache SpamAssassin™ spam score.
- cPanel API 1 Functions - Email::spamboxstatus — This function checks whether the Apache SpamAssassin™ Spam Box is enabled.

Parameters

Parameter	Type	Description	Possible values	Example
account	string	Required The account's email address.	A valid email address on the server.	user@example.com

- cPanel API 1 Functions - SpamAssassin::config - This function prints the cPanel account's Apache SpamAssassin's™ default values.
- cPanel API 1 Modules - SpamAssassin - The SpamAssassin module modifies Apache SpamAssassin™ settings.
