

Branding

This documentation is for a previous release of cPanel & WHM. To view our latest documentation, visit our [Home page](#).

For cPanel & WHM 54

([Home](#) >> [cPanel](#) >> [Branding](#))

- [Overview](#)
- [Upload custom items](#)
- [Uploaded items' locations](#)

Overview

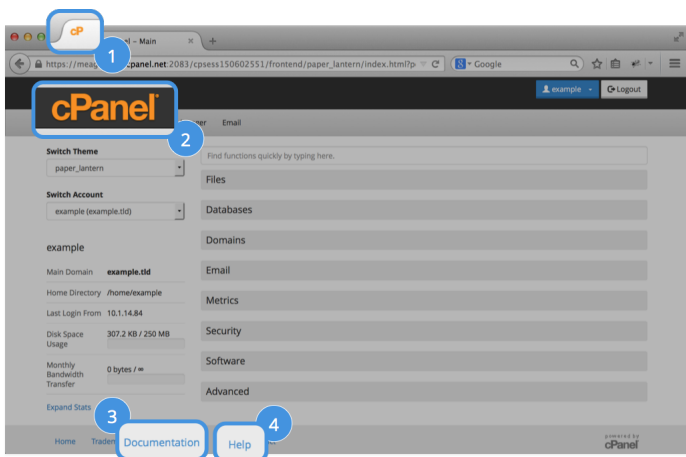

This interface allows you to upload a custom logo, upload a [favicon](#), and modify other aspects of the cPanel interface. Use this interface to quickly modify your users' cPanel dashboards without the need to [develop a new style](#) or write any custom CSS.

This interface stores information in the `reseller_info.json` file, which exists in either the `root` user's or reseller's `brand` directory.

- If the reseller who owns the account has specified custom branding information, the cPanel user sees the reseller's branding in the cPanel interface.
- If the reseller has **not** specified custom branding information, but the `root` user **has** specified custom branding information, the cPanel user sees the `root` user's branding in the cPanel interface.
- If neither the reseller nor the `root` user have specified custom branding information, the cPanel user does **not** see any customizations to the cPanel interface.

Upload custom items

Use the following diagram to see how each entry in the interface affects your customers' dashboard.

1. Upload a custom favicon to change the default favicon. Click *Choose File* in the *Favicon* section to upload a custom favicon.
2. If you do not want to upload a custom logo in the *Company Logo* section, enter the name of your company in the *Company Name* text box to easily brand the dashboard for your company.

Note:

If you use this option, your company name will appear in the default cPanel font. If you wish to change the font style, you must

customize cPanel's CSS. For more information about how to create your own cPanel style, read our [Tutorial - Create a Custom cPanel Style](#) documentation.

3. Enter your documentation website's URL in the *Documentation Link* text box.

The *Documentation* link points to cPanel's documentation website by default.

4. Enter your help or support website URL in the *Help Link* text box.

Note:
The *Help* link will not appear in the cPanel dashboard until you save a URL.

5. Upload a custom logo in the Webmail Logo section to change the logo when your customers access the [Webmail](#) interface.

Uploaded items' locations

When you save your customizations through this interface, the system saves your items in the following directories:

User	Item	File path	File name
Reseller	Favicon	~/var/cpanel/reseller/brand	favicon.ico
	Logo	~/var/cpanel/reseller/brand	logo.png
	Webmail logo	~/var/cpanel/reseller/brand	webmail.png
Root	Favicon	/var/cpanel/customizations/brand	favicon.ico
	Logo	/var/cpanel/customizations/brand	logo.png
	Webmail logo	/var/cpanel/customizations/brand	webmail.png
