## Description

This function resets a BoxTrapper form letter to its default contents.

### Warning:

cPanel API 1 is **deprecated**. We **strongly** recommend that you **do not use** cPanel API 1. However, no equivalent function exists in our newer APIs.

### Important:

In cPanel & WHM version 76 and later, when you disable the MailReceiver role, the system **disables** this function. For more information, read our [How to Use Server Profiles](#) documentation.

## Examples

### ▼ LiveAPI PHP Class

```
$cpanel = new  
CPANEL(); // Connect  
to cPanel - only do  
this once.  
$reset_boxtrapper_file =  
$cpanel->apil('BoxTrapper', 'resetmsg',  
array('user@example.com', 'blacklist.txt'));  
// Call the  
function.
```

### Note:

For more information, read our [Guide to the LiveAPI System](#).

**Note:**  
For more information, read our [Guide to the LiveAPI System](#).

### cPanel Tag System (deprecated)

**Warning:**  
In cPanel & WHM version 11.30 and later, cPanel tags are **deprecated**. We provide this example to help developers move from the old cPanel tag system to our [LiveAPI](#) system. We **strongly** recommend that you **only** use the [LiveAPI](#) system to call the cPanel APIs.

```
<cpanel
Module="BoxTrapper::r
esetmsg(
$FORM('account', 'mess
age') )">
```

cPanel API 1 accesses information about cPanel accounts.

**Warning:**  
cPanel API **deprecated**. We **strongly** recommend [cPanel API](#) or [UAPI](#) instead.
