

Perl Modules

For cPanel & WHM version 11.50

([Home](#) >> [Software and Services](#) >> [Perl Modules](#))

[Overview](#)
[Install Perl modules](#)
[The Installed Modules table](#)
[System modules](#)

Overview

Perl modules are software components in the Perl language. This interface allows you to search for and install Perl modules from the [CPAN](#) repository to your website.

Note:

You **must** install Perl modules before you can use them inside of a Perl program.

Install Perl modules

Note:

If you know the name of the desired module, enter it in the *Install a Module* text box and click *Install Now*.

Perform one of the following actions to find the desired module and install it:

- Enter a search term in the *Search* text box and click *Go*. You will see modules that are specific to that search term.
- Click *Show Available Modules* to see a list of available Perl modules from CPAN.

Note:

\$body

WHM displays the following information for the displayed modules:

Column	Description
<i>Module Name</i>	The module's name.
<i>Description</i>	A description of the module.
<i>Actions</i>	The actions that you may perform for that module.

Note:

\$body

The Installed Modules table

The *Installed Modules* table displays all of the modules that are currently installed to your cPanel account.

For each installed module, the table displays the following information:

Column	Description
--------	-------------

<i>Module Name</i>	The module's name.
<i>Version</i>	The module's version number.
<i>Actions</i>	<p>The actions that you may perform for that module. For each module, you can perform the following actions:</p> <ul style="list-style-type: none">• <i>Update</i> — Update the module.• <i>Reinstall</i> — Reinstall the module from CPAN.• <i>Uninstall</i> — Remove the module from your server.• <i>Show Documentation</i> — Read the module's documentation on CPAN.

System modules

cPanel & WHM includes specific Perl modules. To see a list of the system-installed Perl modules, click *Show System Installed Modules*.

For more information on Perl modules, read our [Guide to Perl in cPanel & WHM](#) and [Third-Party Software](#) documentation.
