

Make a Paypal Payment

(Dashboard >> Billing >> Make a Paypal Payment)

Overview

The *Make a Paypal Payment* interface allows you to pay your account balance with a PayPal® eCheck payment.

Warnings:

- PayPal does **not** automatically post payments to your account unless you pay through the Manage2 interface.
- If you use a PayPal eCheck for payment, PayPal does **not** post the payment to your account until **after** the eCheck clears. If this occurs **after** the due date, your account **may** become past due.

Post a payment

To post a new payment, enter the amount that you wish to pay in the *Payment Amount* text box and click *Submit*.

Note:

Manage2 automatically enters your account balance in the *Payment Amount* text box. It also displays your current account balance above this text box.
