

How to Disable the cPanel Store as an SSL Certificate Provider in WHM

Overview

This article provides instructions on how to use Manage2's *Update Company Information* interface (*Dashboard >> Company >> Update Company Information*) to disable the cPanel Store as an SSL certificate provider. This action helps you manage your users' access to SSL certificates purchases through the cPanel Store. WHM's *Market Provider Manager* interface (*WHM >> Home >> Market >> Market Provider Manager*) lists the cPanel Store as a provider.

This article also provides instructions on how to disable free cPanel-signed hostname certificate downloads for cPanel & WHM users through the cPanel Store.

Note:

cPanel & WHM version 56 introduced the *Market Provider Manager* interface (*WHM >> Home >> Market >> Market Provider Manager*) and free hostname certificate functionality .

How to disable the cPanel Store as an SSL certificate provider in WHM

Note:

You **must** perform this action through the Manage2 interface. For more information, read the [Manage2 FAQ](#) documentation.

To disable the cPanel Store as a provider in WHM's *Market Provider Manager* interface (*WHM >> Home >> Market >> Market Provider Manager*), perform the following steps:

1. Log in to your [Manage2 account](#).
2. From the Manage2 dashboard, navigate to the *Update Company Information* interface (*Dashboard >> Company >> Update Company Information*).
3. In the *cPanel Store Integration* section, select the *Block servers with your company ID from ordering paid SSL certificates from the cPanel Store* checkbox.
4. Scroll to the bottom of the interface and click *Save*.

cPanel Store will no longer appear as a provider in WHM's *Market Provider Manager* interface (*WHM >> Home >> Market >> Market Provider Manager*).

How to disable free cPanel-signed hostname SSL certificate downloads

Note:

You **must** perform this action through the Manage2 interface. For more information, read the [Manage2 FAQ](#) documentation.

To disable free cPanel-signed hostname certificate downloads for servers with your company ID, perform the following steps:

1. Log in to your [Manage2 account](#).
2. From the Manage2 dashboard, navigate to the *Update Company Information* interface (*Dashboard >> Company >> Update Company Information*).
3. In the *cPanel Store Integration* section, select the *Block servers with your company ID from getting free hostname certificates from the cPanel Store* checkbox.
4. Click *Save* at the end of the interface.

Servers with your company ID will no longer automatically download a complimentary hostname from the cPanel Store.
