

Delete a Package

(WHM >> Home >> Packages >> Delete a Package)

- [Overview](#)
- [How to delete a package](#)
- [Additional documentation](#)

Overview

This feature allows you to remove a package from your server.

Warning:

- Exercise caution when you delete a package, because you **cannot** recover a deleted package; you will have to recreate it.
- You **cannot** delete a package that an account on your server currently uses.

How to delete a package

To delete a package, perform the following steps:

1. Select the package that you wish to delete from the *Package* menu.
2. Click *Delete* to delete the package.
