

11.44 Change Log

A version's change log includes entries for both the development and production releases of that version.

For example, changes in cPanel & WHM version 65 appear in the change log for version 66. This is because 65 is the development version whose changes are released in the production version 66. For more information, read our [cPanel & WHM Product Versions and the Release Process](#) documentation.

11.43.0.8

2014-05-06

- Fixed case 52532: Clean out virtfs directories for users that don't exist anymore.
