

Initial Setup Wizard - Set Up Quotas

This document is for a previous release of cPanel & WHM. To view our latest documentation, visit our Home page.

For cPanel & WHM 11.44

<< Step 5: Services

WebHost Manager® (WHM®) User Guide >>

Initial Setup

Step 6 out of 6

Step 1:

Agreement

Step 2:

Setup Networking

Step 3:

Setup IP Addresses

Step 4:

Nameservers

Step 5:

Services

Step 6:**Set Up Quotas**

Set Up Quotas

This is the final stage of the *Initial Setup* process. This section allows you to select whether you wish to track disk usage on your server.

Note:

This is a good idea if you plan to lease server space to individual users. However, if you do not plan to host individual accounts on your server, you may not need to enable quotas.

Quotas

Select whether you wish to enable quotas on your server:

- To set up quotas, select *Use file system quotas*.
- To disable quotas, select *Do not use file system quotas*.

Warning:

If you do not enable quotas, you will **not** be able to track disk space usage.

Save and finish

Click *Finish Setup Wizard*. WHM will save your settings, and the *WHM Home* interface (*Home*) will appear.

- Click the *Go Back* button to return to *Step 5: Services*.

Note:

You may now configure additional server settings in WHM. For more information about WHM's interfaces and functionality, read the documentation in our [WebHost Manager® \(WHM®\) User Guide](#).
