Market Provider Manager

For cPanel & WHM version 56

(*Home >> SSL/TLS >> Market Provider Manager*)

Overview

The *Market Provider Manager* interface allows you to select the certificate providers that you wish to appear in the cPanel Market. cPanel's *SSL/TLS Wizard* interface *(Home >> Security >> SSL/TLS Wizard)* displays the products available through providers in the cPanel Market.

> ⓘ **Important:**
>
> To collect any commissions from a cPanel Market provider that supports commissions, server administrators must:
>
> - Link their WHM account to a valid [cPanelID](#).
> - Enter their email address under the *cPanel Store Configuration* tab .

> ⚠ **Note:**
>
> Your users **must** possess a valid [cPanelID](#) in order to purchase SSL certificates through cPanel's *SSL/TLS Wizard* interface.

Manage providers

Click the *Providers* tab to list available SSL certificate providers, a link to each provider's home page, and a set of actions for each provider.

To allow your users to purchase certificates through a provider, click the appropriate *Enable* toggle switch.

To disable the provider, click the appropriate *Disable* toggle switch.

> ⚠ **Note:**
>
> If you disable a provider, that provider's certificates will remain active on the server. The server will send alerts as the expiration date for the certificate or certificates approach. However, the server will **not** automatically renew the certificates on behalf of the customer.
>
> - The customer can replace existing certificates with ones from the provider or providers that you allow in this interface.
> - If the customer wishes to use the same provider, they need to purchase the certificates directly from the provider and install the certificates manually.

Manage products

Click the *Products* tab to list all products available through enabled cPanel Market providers.

Manage product recommendation

To flag a product as Recommended, click the star ( ) icon.

To remove the recommendation, click an active star ( ) icon.

Manage product availability

To allow your users to purchase a certificate product, click the appropriate *Enable* toggle switch.

To disable the product, click the appropriate *Disable* toggle switch.

Manage product price

To manage a product's price, perform the following steps:

1. Click the appropriate edit link.
2. Use the controls to set the new price.
3. Click *Save.*

The interface will automatically recalculate and display the commission amount.

⚠️ **Note:**

You may **only** select prices in multiples of 12 cents for cPanel Store certificates. This is due to the commission system.

Manage commissions

✅ **Reminder:**

Server administrators **must** enter a valid email address as a commission recipient in order to collect sales commissions from a cPanel Market provider that supports commissions.

To manage the recipient of commissions on cPanel Market purchases by users, perform the following steps:

1. Click the *cPanel Store Configuration* tab.
2. Enter the address in the text box.
3. Click *Set Commission ID.*

⚠️ **Note:**

This value defaults to the system administrator's email address in WHM's *Basic cPanel & WHM Setup* interface (*Home >> Server Configuration >> Basic cPanel & WHM Setup*).

To collect your commissions, click the *Payout Link* in the table and follow the instructions.
