

Change Log

(WHM >> Home >> cPanel >> Change Log)

- [Overview](#)
- [Change Logs](#)
- [Additional documentation](#)

Overview

This interface lists published builds of cPanel & WHM software. The *Change Log* interface's entries include fixes, enhancements, and patches.

Change Logs

On the left side of the interface, click *Change logs for all versions* to view a list of available change logs for all versions of cPanel & WHM, EasyApache, and the Migration Script.

On the right side of the interface, click *Change Log feed* for your server's version of cPanel & WHM, or click *Change Log feed for all versions* to view the feed for all versions of cPanel & WHM. The feeds are in Atom format, which you can add to your preferred feed reader to automatically receive change log updates.
