Overview

The `/scripts/migrate_legacy_wordpress_to_modern_wordpress` converts legacy cPAddon WordPress® installations to the RPM-based WordPress cPAddon.

Script functions

The `/scripts/migrate_legacy_wordpress_to_modern_wordpress` script performs the following actions for each specified WordPress installation:

1. Scans the cPanel account's home directory for the `cPanel::Blogs::WordPress.yaml` file.
2. Verifies that the WordPress version is greater than 3.7.
3. Removes the `cpaddons-site-software` WordPress plugin.
4. Updates the WordPress installation to use the RPM-based WordPress cPAddon.

Run the /scripts/migrate_legacy_wordpress_to_modern_wordpress script

To use this script, run the following command as the `root` user:

```
/scripts/migrate_legacy_wordpress_to_modern_wordpress [arguments] user instance
```

User and installation selection

Use the following arguments to target the installations to convert:

Argument	Description
<code>--all</code>	Converts all legacy cPAddon WordPress installations to the RPM-based WordPress cPAddon.
<code>--user</code>	Converts all legacy cPAddon WordPress installations for the specified cPanel accounts to the RPM-based WordPress cPAddon.
<code>--instance</code>	Converts a single legacy cPAddon WordPress installations for the specified cPanel account and instance to the RPM-based WordPress cPAddon.

Other options

You can use the following options with the `/scripts/migrate_legacy_wordpress_to_modern_wordpress` script:

Argument	Description
<code>--no-color</code>	Removes the colorized output that the script provides.
<code>--dryrun</code>	Only reports information about the currently installed legacy WordPress installations.
<code>--help</code>	Returns the script help documentation.
<code>--verbose</code>	Returns additional information in the script's output.

Script examples

To convert all legacy WordPress sites on the server, run the following command:

```
/scripts/migrate_legacy_wordpress_to_modern_wordpress --all
```

To convert all the legacy WordPress sites for the cPanel account `frank`, run the following command:

```
/scripts/migrate_legacy_wordpress_to_modern_wordpress --user frank
```

To convert all the legacy WordPress sites for the cPanel accounts `frank`, `tommy`, and `jenny`, run the following command:

```
/scripts/migrate_legacy_wordpress_to_modern_wordpress --user frank --user tommy --user jenny
```

To convert a specific legacy WordPress site for the cPanel account `frank`, run the following command:

```
/scripts/migrate_legacy_wordpress_to_modern_wordpress --user frank --instance /home/frank/.cpaddons/cPanel::  
Blogs::WordPress.1.yaml
```
