Overview

The documents in this section describe advanced procedures for various features within cPanel & WHM. We recommend that only experienced Systems Administrators execute the procedures that these documents contain.

If you need help with any of these procedures, [open a technical support ticket](#).

Warning:

Some of the documents in this section describe dangerous procedures or unsupported workarounds that we do **not** guarantee will work in the future. Exercise caution when you execute the steps in these documents.

Important information

Before you execute the steps in any of this section's documents, we **strongly** suggest that you understand the following information:

- These documents do **not** account for any additional changes or customizations to your server.
- We **only** tested the instructions in these documents on default installations of CentOS and Red Hat® Enterprise Linux®.
