

View Available Locales

(WHM >> Home >> Locales >> View Available Locales)

- [Overview](#)
- [How to view available locales](#)
- [Additional documentation](#)

Overview

This interface allows you to view available locales, cross-referenced against the themes for which they are available.

How to view available locales

A check mark () indicates that the locale is available for a particular theme.

The *Provider* column displays whether cPanel, Inc. provided the locale.

Icon	Provider
	cPanel, Inc. provided this locale.
	cPanel, Inc. did not provide this locale.

Note:

To refresh the list of your system's locales, click *rebuild the locale databases* at the bottom of the interface to update the system.
